Gary,

You should have received a message from me stating that our inspector will be providing whatever information she can. I corrected the message to have her send me the information and then I will send it to you.

Janet

Subject: West Fertilizer, Inc.

Janet:

I am sending you a kmz file that can be double clicked and installed on a google earth program that you have installed. We have talked with the Texas State Chemist and they have identified the location of some of the chemicals and areas on the site. We are very interested in the location of the pesticide/herbicide/funjicide storage for the facility. I would appreciate it very much if you could let us know where that storage would have been located on the property.

Thanks

Gary Moore
